- ✓ Software Developer from Wuppertal Germany with a passion for open source, frontend development, and UX
- ✓ University degree in Mathematics and Computer Science
- ✓ Creator of FluffyChat (since 2017)
- ✓ Lead developer for the Famedly App since 2019

Matrix-ID: @krille:janian.de

Quick Information about our app

1

Cross-Platform

iOS, Android, and Web applications are developed from a unified code base, while maintaining native application performance.

2

Flutter Framework

By using the Flutter framework and by written in Dart, Famedly offers nearly native performance.

3

Responsive

The user interface adapts to varying screen sizes, providing distinct interfaces optimized for mobile devices, tablets, and desktop computers.

4

Our Matrix SDK

Famedly uses our own Matrix Dart SDK, which is also used by FluffyChat.

5

TI-Messenger

Offers a lot of additional features on top of Matrix.

6

Featureful

Supports end to end encryption, cross signing, Key backup, User verification and video calls via Livekit.

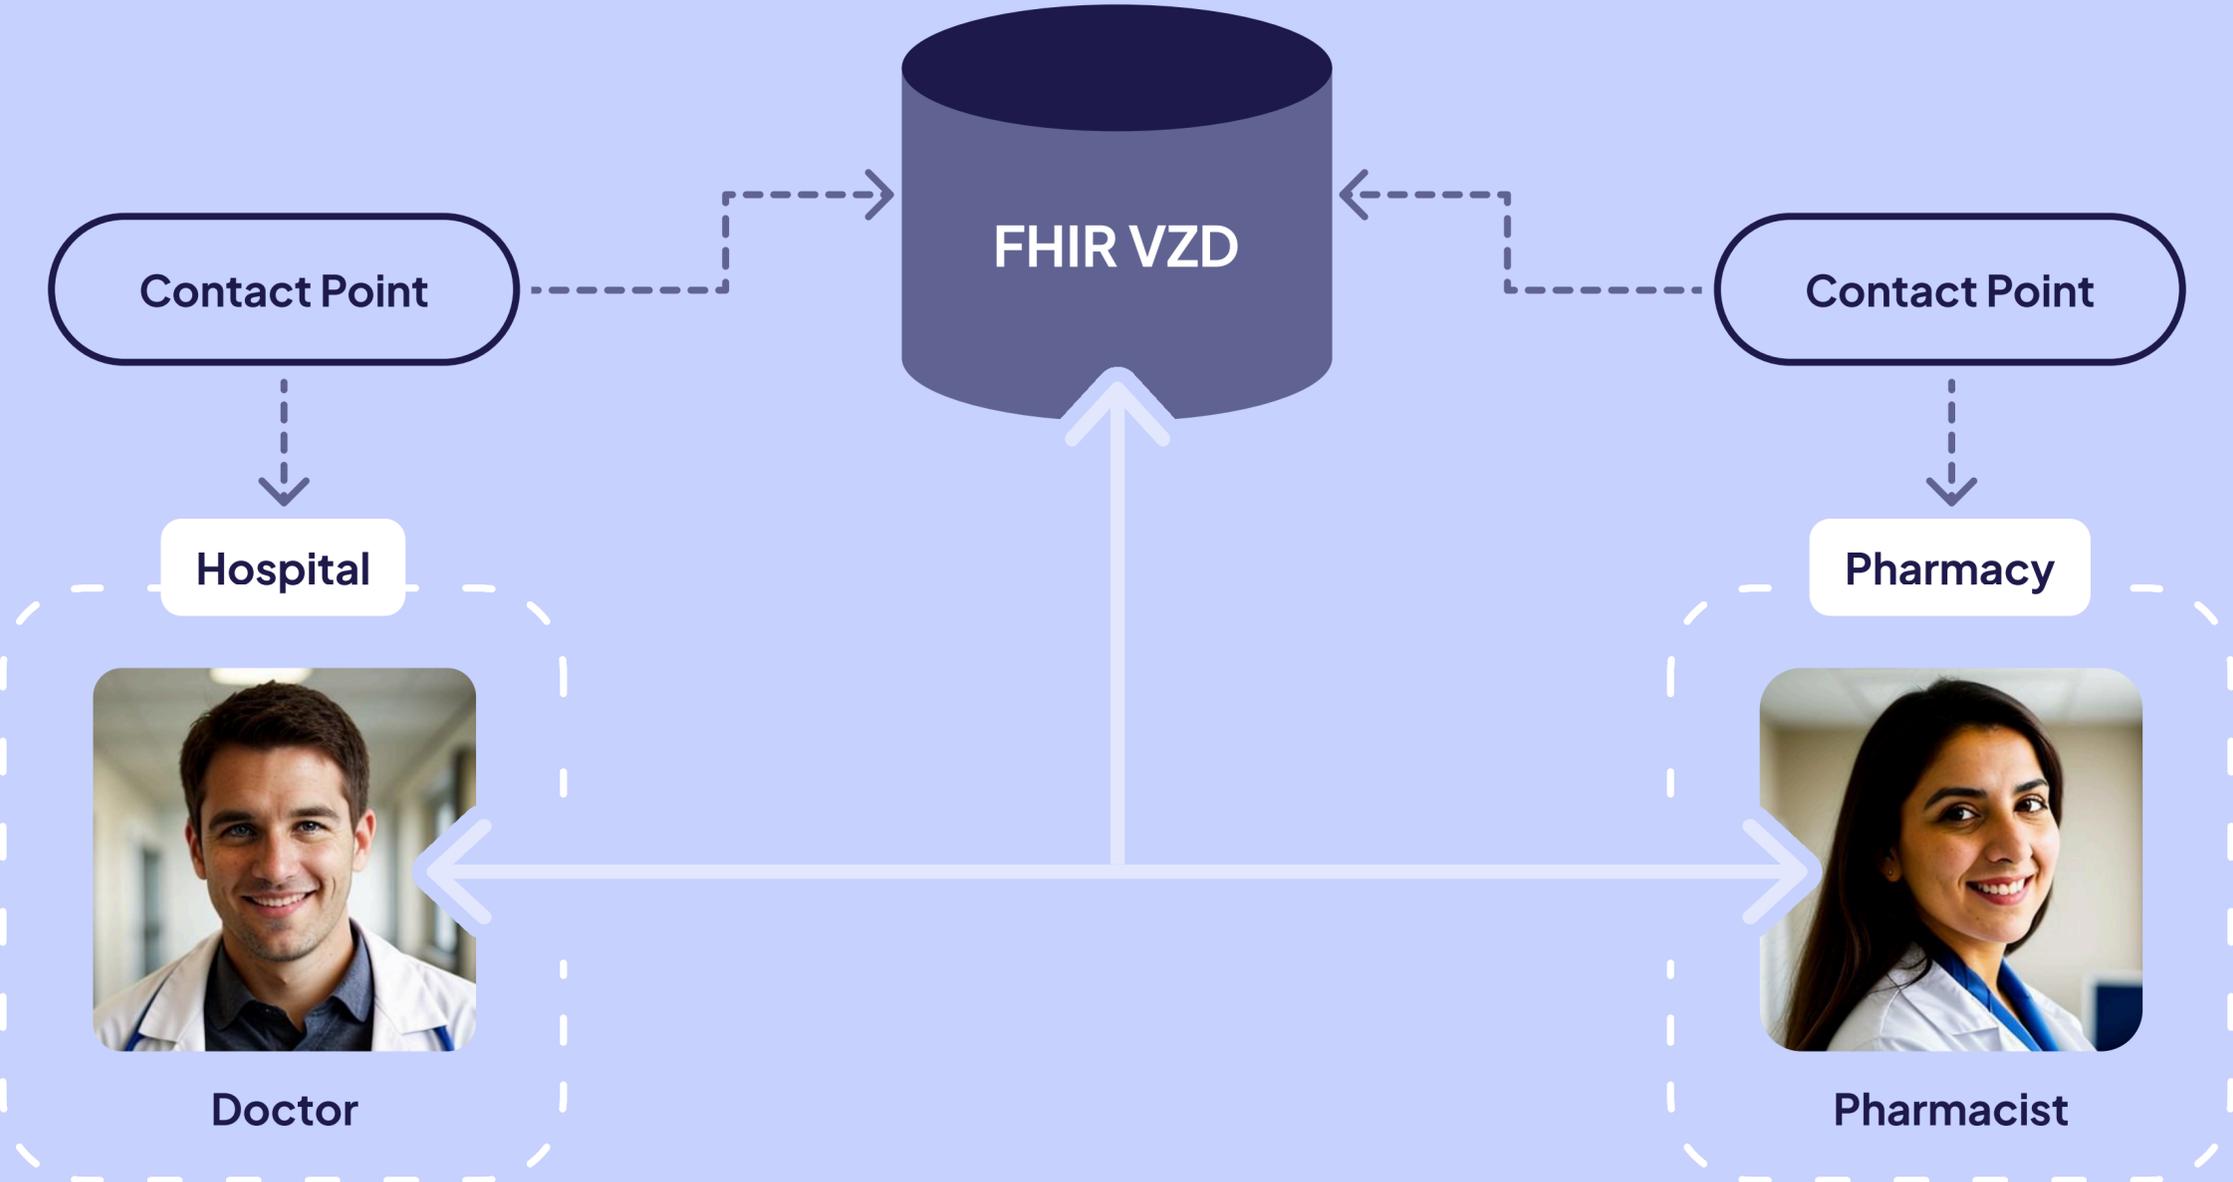

Famedly Feature: Connect your eHBA

Smartcard used by professionals in the German healthcare system can be used with Famedly.

- Verify your identity
- Use the Gematik directory to discover eHBA users
- Doctors can send secure medical orders directly (no fax, no delay)

Connect with users and organizations with the gematik FHIR VZD

Sending Medical Orders from Famedly

Authentifizierte medizinische Anordnung

Anordnungsdetails

Versicherten Name

Geburtsdatum

Medizinische Anordnung

0 / 500 Zeichen

Anordnender Arzt **automatisch ausgefüllt**

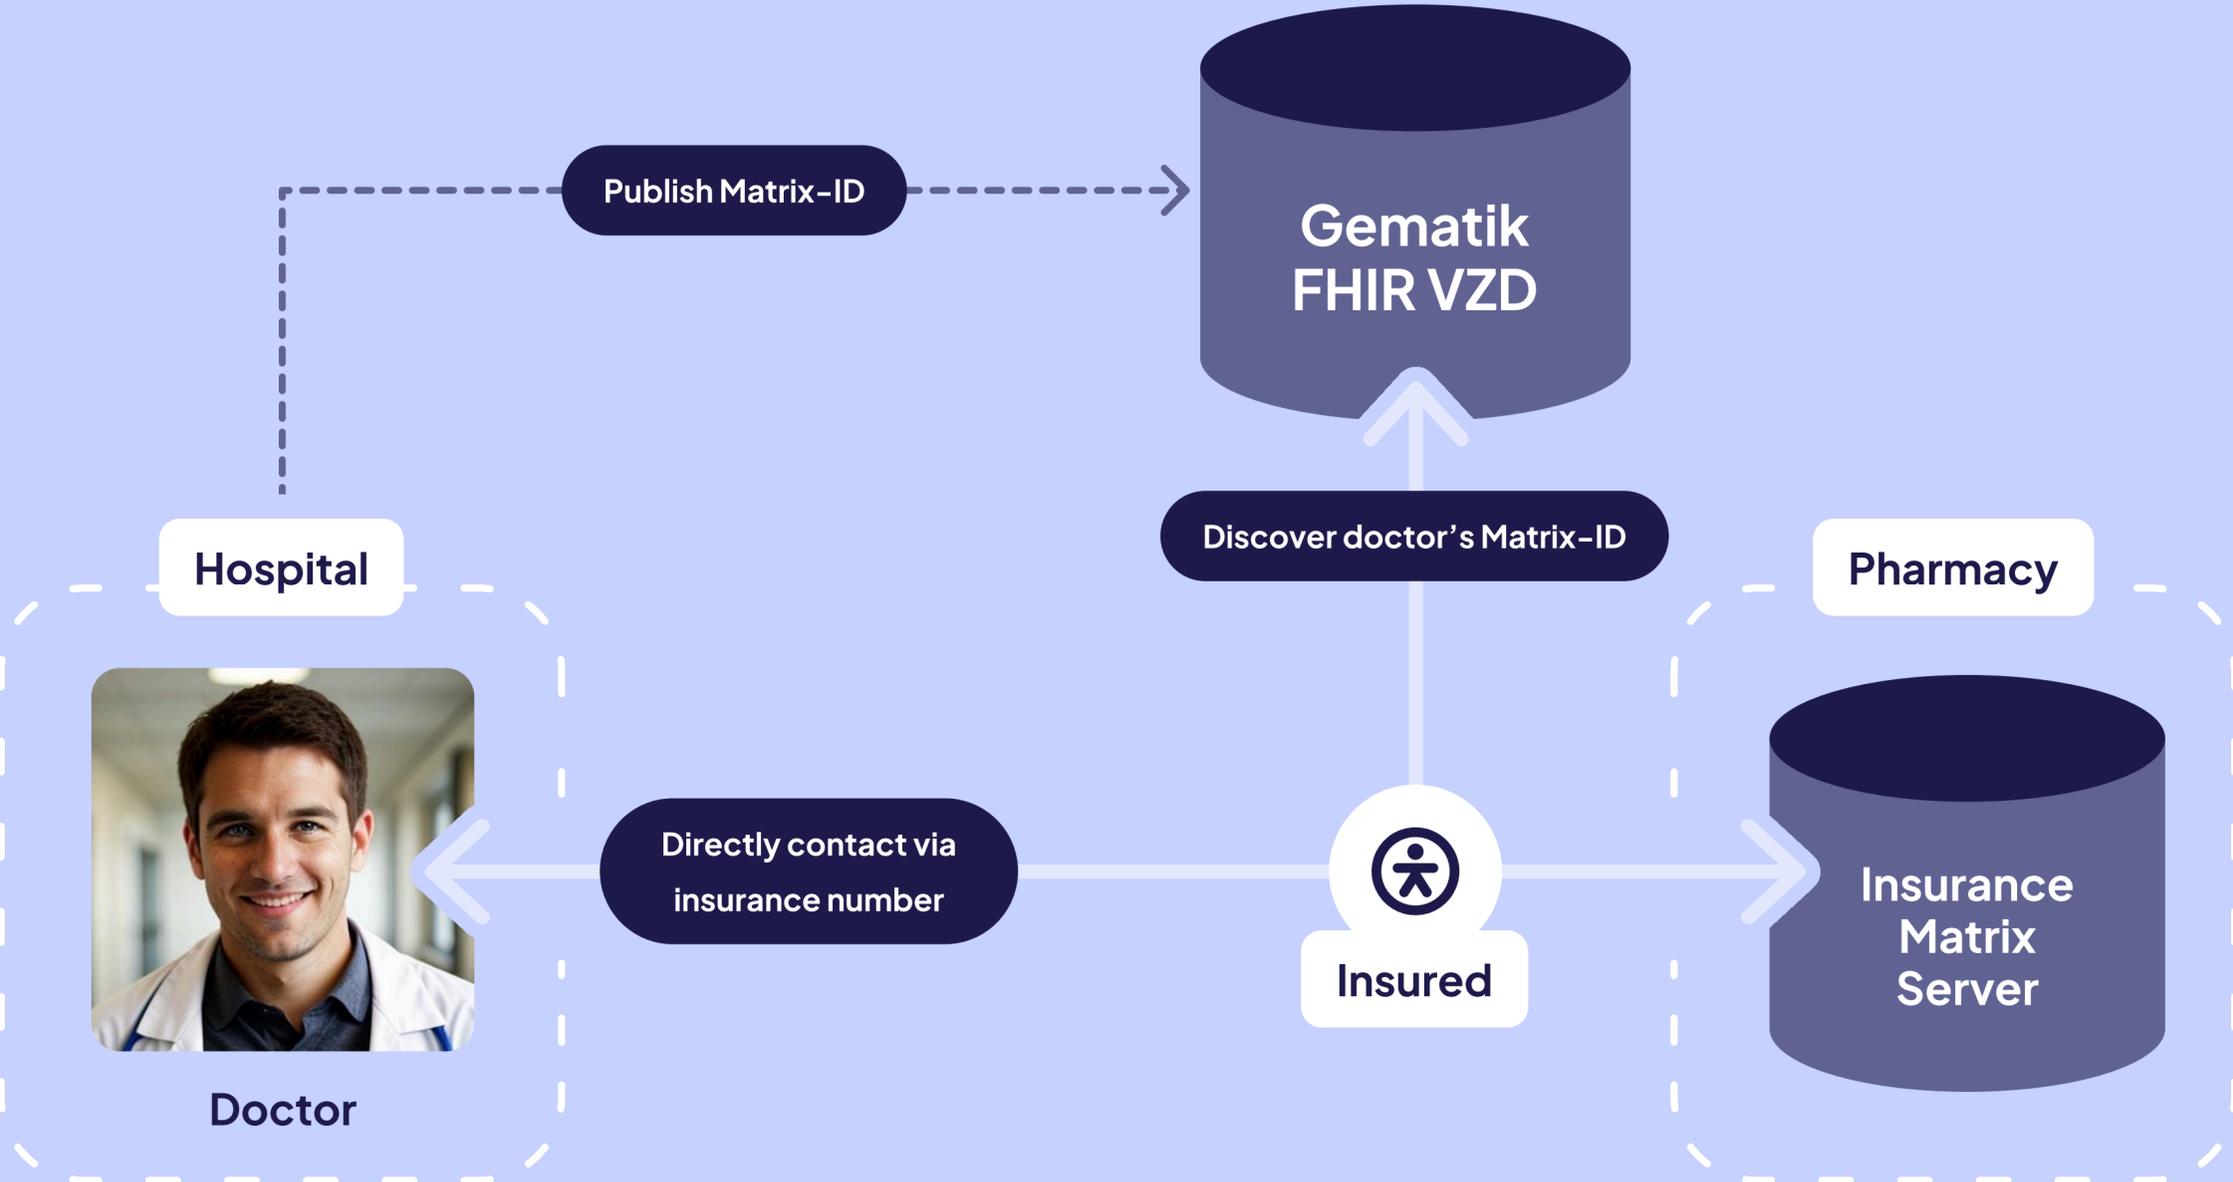

Name: Emilio Frankfurter
Telematik ID: 1-HBA-Testkarte-883110000143487
Organisation: TIM Gamma

Senden

Abbrechen

- Doctors with validated eHBA card can create medical orders
- Special message type 'com.famedly.medical_order'
